

C'est la dernière semaine d'école!

Voici des activités que tu peux continuer à faire à la maison!

6^e
année

Colorie une grille de centièmes avec différentes couleurs et calcule le pourcentage de chaque couleur!

Dessine une grille de centièmes (trace 10 lignes verticales et 10 lignes horizontales). Colorie différentes cases différentes couleurs. Ensuite, calcule le pourcentage de chaque couleur!

Quel est le pourcentage d'orange colorié ici?

Essaie des jeux de cartes qui incorporent les mathématiques!

math Card Games

ADDITION & SUBTRACTION

Go Fish for 10

- Remove Kings and Jacks (ace=1, queen=0)
- Each player gets 4 cards.
- Play just like Go Fish, but instead of looking for matches, look for combinations of 10.

Closest to 0

- Remove face cards
- Each player gets 4 cards
- Players take turns drawing a card from pile and deciding to swap a card or discard.
- The goal is to have the sum of cards in your hand be the lowest.
- To end the game, a player says "Closest to Zero" and lays down their cards. Other players get one more turn and lay down their cards.
- The player with the lowest sum of all cards wins.

Go for 10

- Remove face cards
- Lay out 20 cards face up
- Each player turns removing two cards that add up to ten.
- Try to remove as many cards from the table as possible.

Sum War

- Remove Kings and Jacks (ace=1, queen=0)
- Split the deck equally.
- Each player turns over two cards and says the sum of their numbers. The person with the greater sum wins and takes the cards.
- Play for a certain amount of time or until all the cards are gone.
- The person who gets all the cards first, or who has the most cards, wins.
- You can also play using subtraction.

Salute

- Remove face cards
- Sit in a circle and take turns being the judge.
- When the judge says "Salute!" the players put their card on their forehead without looking at it.
- The judge announces the sum of the two cards.
- Players try to guess the amount on their card based on the card the other player is holding.

25

- Remove face cards
- Split the deck equally
- Each player turns over a card and adds it to the previous number.
- You keep adding cards until you reach 25.
- If a person's card would go over 25, they need to subtract the number.
- When someone hits 25, they win.

THAT FUN TEACHER

Un projet d'art avec les triangles!

Sur une feuille de papier blanc, utilise une règle pour tracer des lignes partout sur la feuille. Colorie les formes qui sont créées par les lignes qui s'intersectent. Combien de triangles peux-tu trouver? Quels types de triangles sont-ils?

Jouez des jeux de société qui incorporent les mathématiques!

Voici une liste de jeux de société populaires qui utilisent la mathématique. Ce sont des jeux assez communs, donc vous avez peut-être quelques-uns chez vous que vous pourrez jouer avec votre famille!

- Yahtzee
- Monopoly
- Dominoes
- Phase 10
- Rummikub
- Life
- Risk
- Battleship
- Mastermind
- Cranium
- Cribbage
- Connaissez vous d'autres??
